

Case Study

The Salford Sports Village is a state of the art facility providing a fantastic range of sporting and training opportunities for everyone.

The concept of multi sport hub's is currently being promoted by the Football Association to provide a new wave of quality facilities that are capable of offering sustainable and manageable sporting provision alongside a range of other services relevant to the local community. The Salford Sports Village is the first such facility of its kind.

The £5m development has been funded through eight different funding partners:

- Sport England/Big Lottery
- The Football Foundation
- FIFA
- Salford City Council
- The FA
- New Deal for Communities
- European Regional Development Fund
- Neighbourhood Renewal Fund.

The complex will be managed by Salford Community Leisure Limited and is also the new home of Manchester FA.

The building boasts excellent changing accommodation for football and other sport teams.

There is a community room with optional bar area available for corporate hire and bookings in conjunction with sporting activities. There are also a number of additional areas available for meetings, activity sessions and courses.

For those wanting to develop their mind as well as their body, there is a fully equipped Information Communication Technology (ICT) suite located on the first floor of the building. It has over 20 computers and is equipped with adaptive hardware and software to assist individuals with visual impairments and disabilities. A variety of courses will be run by Eccles College within the ICT suite ranging from IT for beginners to advice on creating healthy diet plans.

The facility boasts several grass football pitches, two 3rd generation synthetic pitches and a grass practice area. The pitches are floodlit and provide outdoor use in all weathers.

As well as offering the opportunity to hire the pitch privately, Salford Community Leisure and Manchester FA will be providing organised coaching sessions and courses. These sessions are designed to cater for all ages and abilities and offer the highest standard of instruction.

A programme of activities is being developed to cater for people of all ages and abilities.

Sessions including aerobics, Tai Chi, over 50's classes and the exciting Fun City Tots programme, aimed at pre-school children, are going to be available and will constantly be reviewed ensuring customer satisfaction.

The facility also offers arts and crafts, dance and performance sessions providing a cultural edge!

The facility opened to the public on Monday February 27th 2006 and was constructed by G & J Seddon Ltd.

Logistique heads onto the net

Logistique's new website has been launched by Norwich based designers [run2](#).

The site has been designed to promote Logistique's active projects and act as a portfolio of completed enterprises, and has been created to be fully accessible to any user.

Nik Davy, design and director at run2, said: "We're proud of the site - both the way it looks, and the way it works. Working with Jon & Steve is always a pleasure, and we look forward to helping them out again in the near future."

The Heywood Sports, Culture and Leisure Village

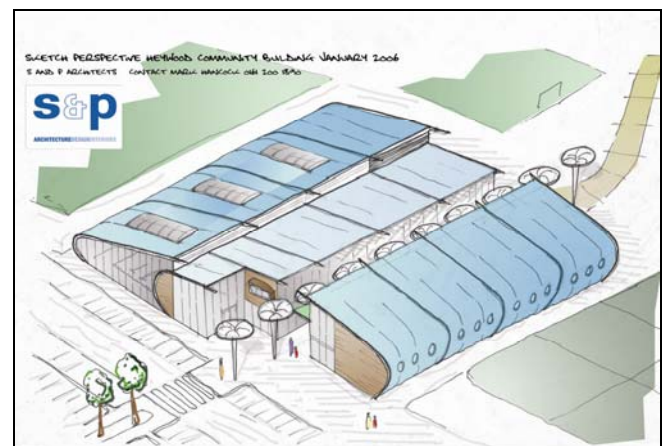

The proposed Heywood Sports, Culture and Leisure Village is an exciting project currently being developed by a number of key stakeholders including New Heart for Heywood NDC.

It is envisaged that once built the use of the facility will be much wider than Sport and Physical Activity. Whilst it is hoped to bring the very best in Community Sports facilities to the area; health, education and culture are also planned to play a big role in any development.

The objectives of the Village are:

- To develop the Heywood Sports Village to provide a sporting opportunity for all and, at the same time, to use sport to deliver wider social outcomes of inclusion, crime reduction, health improvement and civic pride for residents of Heywood.
- To provide a fit for purpose, sport, leisure and cultural village that creates the opportunity for local people, in particular young people to take part in sport and physical activity. In addition, the village will provide additional services including being the base for local economic regeneration.

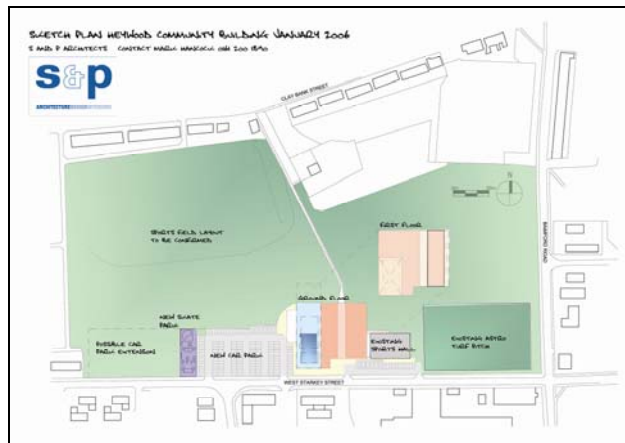

The concept of multi sport hub's is currently being promoted by the Football Association to provide a new wave of quality facilities that are capable of offering sustainable and manageable sporting provision alongside a range of other services relevant to the local community.

The exact facility mix is yet to be agreed on and will very much depend on the need for new facilities matched against the ability to obtain funding. There are various logical suggestions at the moment such as work to the swimming pool, sports hall and outdoor football facilities.

The recent feasibility study consultation has demonstrated need and demand for the following facilities:

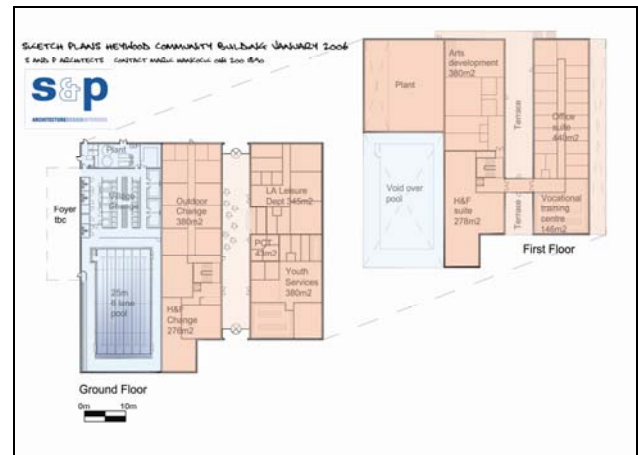

- Leisure Trust office space
- 25 metre 6 lane pool + learner pool
- Refurbished Sports Hall
- c50 station health and fitness suite
- Dedicated space for young people
- Arts/Cultural space

- Healthy Living Coordinator residence
- Vocational training centre managed work space
- Third generation turf synthetic pitch
- Outdoor changing rooms x 8

- Grass playing pitches (adult and junior)
- Skatepark

It is likely that construction work on the complex will not begin until late 2006 / early 2007 with a very tentative anticipated opening date of Spring 2008.

It is difficult to say how much the facility will cost as the sketch scheme design mix is still in the early stages of development and there are a considerable number of factors that could increase or decrease the cost. It is fair to say that it is a major project and will cost several millions of pounds.
