

## **Logistique goes PRINCE 2**

Logistique's key staff, Jon Dutton, Phil Heap and Stephen Brown recently attended a PRINCE2 Foundation course and all passed with flying colours!

The 3 day intensive course was part funded through a leadership grant from Business Link.

Prince2 is a de facto standard used extensively by the UK Government and is widely recognised and used in the private sector, both in the UK and internationally. The method PRINCE2 is in the public domain, offering non-proprietary best practice guidance on project management. PRINCE2 is a registered trademark of OGC. The key features of PRINCE2 are:

- Its focus on business justification
- A defined organisation structure for the project management team
- Its product-based planning approach
- Its emphasis on dividing the project into manageable and controllable stages
- Its flexibility to be applied at a level appropriate to the project.

Managing Director, Jon Dutton said "We are finding that more and more of our local authority clients are using PRINCE2 to manage their projects". "We felt that whilst we have had extensive experience of project management attaining the industry recognised standard was important". Our Principal Consultant, Phil Heap performed so well he finished top of the class in the exam!"
